NEW:
bigger capacity, maximised protection

The NEW *DataPlus+* range from Chubbsafes has been expertly designed to ensure you have the best protection for your vital data media now with extra capacity.

DataPlus+

fire resistant data protection

Key features

- Easy slam action emergency closing in event of a fire.
- Generous capacity. Chubbsafes cabinets have been designed to give you more for your money than most other manufacturers' cabinets.
- Quality media protection.
- 2 hour datamedia protection label. Tested to the highest international standards; UL 72 and EN 1047-1. CEN Norm is certified by ECB.S in class S 120 DIS.
- Easy to transport and install. Low weight ratio due to new advanced fire protection barrier material.
- Ability to customise by using internal fittings to optimise your storage capacity.

- Removable front plate allows useage of a pallet loader for a more efficient installation, additionally allowing a cost advantage to the customer.
- Ability to base fix to the floor for an effective prevention of physical removal.
- The cabinet is fitted with a keylock as a standard. However, you may require the monitoring of access to your sensitive data and therefore we have a series of electronic locks ranging from basic locking to more sophisticated audit trails.
- The cabinet is an attractive light grey which fits in well in most office interiors.

Keylock

Electronic Lock
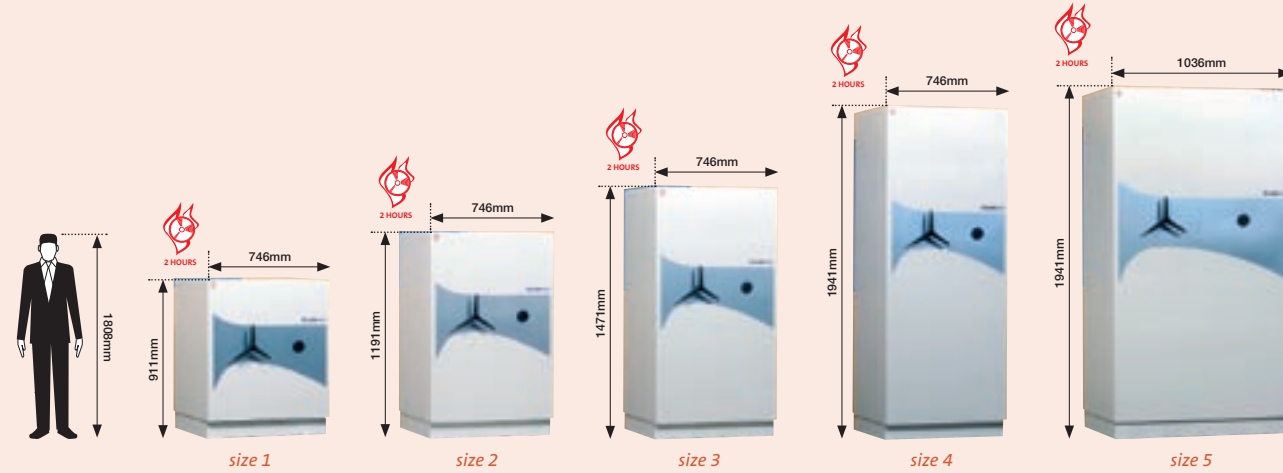

Part 1: EN 1047-1, UL- 72 and NT 017 FIRE tests.

Stage 1
The Cabinet is placed inside the furnace and heated to a temperature greater than 1000°C.

Stage 2
The furnace burners are switched off and the cabinet remains in the furnace for a period of controlled cooling. During which the internal temperature and humidity continue to be monitored until the temperatures are seen to reduce.

The furnace is so hot the paint and handle are seen to melt off.

NT Fire test finishes.
No drop test is performed.

Time   60/120 mins

As the cabinet is affected by heat for a much longer time, the testing period can actually take up to 24 hours.

Part 2: EN 1047-1, UL-72

Stage 1 - Insertion
Cabinet is inserted into the preheated oven for upto 45 mins.

Stage 2 - 9.15m Drop
It is then dropped 9.15 metres onto a bed of rubble.

Stage 3 - Re-insertion
The cabinet is placed back into the furnace for upto another 45 minutes.

Stage 4 - Cooling
A controlled cooling period during which the maximum internal temperature is measured.

Time   22.5/45 mins   20 mins   22.5/45 mins

As the cabinet is affected by heat for a much longer time, the testing period can actually take up to 24 hours.

Below illustrates the devastation caused after a fire. Imagine what would be left of your vital data media if it were not stored in a Chubbsafes' cabinet.

Chubbsafes ensures its products have proven quality to withstand such conditions and protect your vital data media
